EC220: Mathematical Economics 1A

EC220 Q1) The lecturer is good at explaining things and has helped me to understand the subject

EC220 Q2) Support and Feedback Classes have been useful in building upon material covered in lectures and have enhanced my understanding of the subject.

Comments

The tutor tries to ensure that we are all understanding the content. Sometimes she goes over the content too fast and I would appreciate if she elaborated a bit more in complex areas. Overall a great tutor.

Miss Sohn is good at explaining and I feel comfortable to ask questions during the tutorials and she's always willing to help.

The tutor has tried to go through the in-class exercise sheet and explain, but I didn't learn anything from these classes. It would be best if she explained first the week's content in a simple and effective way, and then go through the sheets slowly whilst teaching how to tackle each questions instead of rapidly going through the answers.

The seminar tutor went through the in class questions mostly fully. 2 hour seminars would be ideal as we could get through all the in-class questions and go through it at a slower pace. Since the lecture content is more difficult than the other modules I take, it takes longer to come to grips with the lecture content on a weekly basis.
